please do not report the images to the
Image Problem Mailbox.

What Is Claimed Is:

Sub. A1

1. A movable sink fixture secured to a wall, comprising:

- a) a sink fixture;
- b) means for moving said sink fixture vertically with respect to said wall;
- 5 c) means for moving said sink fixture horizontally with respect to said wall; and,
- d) means for locking said sink fixture in place once said sink fixture has been moved to a desired location with respect to said wall.

Sub. B1

2. The movable sink fixture as recited in Claim 1, wherein the means for moving said sink fixture vertically with respect to said wall comprises:

- 10
- a) at least one support bracket; and,
 - b) a fixture base;

wherein said sink fixture is slidably secured to said fixture base using said at least one support bracket.

3. The movable sink fixture as recited in Claim 1, wherein the means for moving said sink fixture horizontally with respect to said wall comprises:

- 15
- a) at least one support rail fixedly attached to said wall;
 - b) a fixture base;

wherein said sink fixture is slidably secured to said fixture base which is slidably connected to said at least one support rail.

20 4. The movable sink fixture as recited in Claim 1, wherein the means for locking said sink fixture in place once said sink fixture has been moved to a desired location with respect to said wall comprises a securing bolt assembly.

subcl

5. A movable shower fixture secured to a wall, comprising:

- a) a shower fixture;
- b) means for moving said shower fixture vertically with respect to said wall;
- c) means for moving said shower fixture horizontally with respect to said wall; and,
- d) means for locking said shower fixture in place once said shower fixture has been

moved to a desired location with respect to said wall.

6. The movable shower fixture as recited in Claim 5, wherein the means for moving said shower fixture vertically with respect to said wall comprises:

- a) at least one support bracket; and,
- b) a fixture base;

wherein said shower fixture is slidably secured to said fixture base using said at least one support bracket.

7. The movable shower fixture as recited in Claim 5, wherein the means for moving said shower fixture horizontally with respect to said wall; comprises:

- a) at least one support rail fixedly attached to said wall; and,
- b) a fixture base ;

wherein said shower fixture is slidably secured to said fixture base which is slidably connected to said at least one support rail.

8. The movable shower fixture as recited in Claim 5, wherein the means for locking said shower fixture in place once said shower fixture has been moved to a desired location with respect to said wall comprises a securing bolt assembly.

subcl

9. In a room having at least one wall, a movable wet wall comprising:

- a) a folding panel; and,
- b) means for moving said folding panel horizontally along said at least one

wall.

5 10. The movable wet wall as recited in Claim 9 wherein the means for moving said folding panel horizontally along said at least one wall comprises at least one support rail fixedly attached to said wall; wherein said folding panel is slidably secured to said at least one support rail.

11. The movable wet wall as recited in Claim 9 wherein said folding panel is waterproof.

12. The movable wet wall as recited in Claim 9 wherein said folding panel is water resistant.

10 13. A floor drain system, comprising:

a) at least one floor drain tile having at least one aperture operatively arranged for draining water through said drain tile;

b) at least one drainage basin operatively positioned beneath said aperture in said drain tile;

15 c) at least one drainage connecting pipe; and,

d) at least one drainage sewer pipe; wherein said at least one sewer pipe is operatively connected to said at least one connecting pipe which is operatively connected to said at least one drainage basin in which draining water is collected to drain through said at least one connecting pipe to said at least one sewer pipe.

20

sub c1

14. A movable-bathroom-fixture apparatus, comprising:

- a) a movable sink fixture secured to a wall;
- b) a movable shower fixture secured to a wall;
- c) a movable folding wet wall secured to a wall;

d) means for slidably supporting said movable sink fixture, said movable shower fixture, and said movable folding wet wall wherein said movable sink fixture, said movable shower fixture, and said movable wet wall are all slidably connected to said means for support; and,

e) means for locking said movable sink fixture, said movable shower fixture, and said movable folding wet wall in place once said movable sink fixture, said movable shower fixture, and said movable folding wet wall have been moved to a desired location with respect to said wall.

15. A movable-bathroom-fixture apparatus, comprising:

- a) a movable sink fixture secured to a wall;
- b) a movable shower fixture secured to a wall;

c) means for slidably supporting said movable sink fixture, and said movable shower fixture, wherein said movable sink fixture and said movable shower fixture are all slidably connected to said means for support.

sub c/

16. A movable-bathroom-fixture apparatus, comprising:

- a) a movable shower fixture secured to a wall;
- b) a movable folding wet wall secured to a wall;
- c) means for slidably supporting said movable shower fixture, and said movable

folding wet wall, wherein said movable shower fixture and said movable folding wet wall are slidably connected to said means for support.

17. A movable-bathroom-fixture apparatus, comprising:

- a) a movable sink fixture secured to a wall;
- b) a movable folding wet wall secured to a wall;
- c) means for slidably supporting said movable sink fixture and said movable folding

wet wall, wherein said movable sink fixture and said movable folding wet wall are slidably connected to said means for support.

18. The movable-bathroom-fixture apparatus as recited in Claim 14 where in the means for slidable support with respect to said wall comprises at least one support rail, wherein said movable sink fixture, said movable shower fixture, and said movable wet-wall are slidably secured to said at least one support rail.

19. A removably securable fixture panel, comprising

- a) a frame with attached fixture, wherein said frame is removably securable to a wall;

and,

- b) means for locking said frame with attached fixture in place within said wall.

sub c1

20. The removably securable fixture/panel recited in claim 19 wherein said attached fixture comprises a shower fixture.

21. The removable securable fixture panel recited in claim 19 wherein said attached fixture comprises a sink fixture.

22. The removable securable fixture panel recited in claim 19 wherein said attached fixture comprises a storage fixture.

23. In a room having a first wall and a second spaced apart parallel wall, a movable wall fixture unit, comprising:

a) a supply rail mounted to said first wall;

b) a support rail mounted to said second spaced apart parallel wall;

c) a support beam slidably mounted to said supply rail and support rails, respectively;

and,

d) a movable wall fixture unit secured to said support beam, and operatively arranged

for movement between said first and second walls, and parallel to said first and second walls.

24. The movable wall fixture unit of Claim 23, wherein the movable wall fixture unit further comprises a first side having a shower fixture slidably attached thereto, wherein said shower fixture is vertically adjustable.

25. The movable wall fixture unit of Claim 23, wherein the movable wall fixture unit further comprises a second side having a sink fixture slidably attached thereto; wherein said sink fixture is vertically adjustable.

26. The movable wall fixture unit of Claim 23, wherein the movable wall fixture unit further comprises a first end to which is attached a foldable screen.

sub c1

27. A fixture interface unit comprising;

- a) a fixture holding panel;
- b) a fixture holding panel base;
- c) at least one fixture;
- d) at least one fixture holding bracket;
- e) a counter balancing means,

wherein said at least one fixture holding bracket removably secures the at least one fixture to said fixture holding panel which is slidably affixed to said fixture holding panel base, and wherein further said counter balancing means are fixedly attached to said fixture holding panel to provide the means to vertically adjust said at least one fixture.

28. A height adjustable toilet seat apparatus, comprising at least two toilet seats wherein each of said seats is hingedly attached to pivot about a common pivot axis.
